

# Software Release Notes – R57x0 Firmware Version 1.1.7

July 23, 2023

## ***Table of Contents***

Introduction .....	2
Fixed Defects .....	2
New Features .....	2
Known Issues and Limitations .....	2

## Introduction

This document describes version 1.1.7 of the firmware for the ThinkRF R57x0 family of real-time spectrum analyzers. It is distributed as a single binary file, *ThinkRF\_R57x0\_firmware\_v1-1-7.img*.

This version of the R57x0 firmware is compatible with all ThinkRF R57x0 products, including R5700 (all models) and R5750 (all models).

Refer to the product's [User Guide](#) for how to do firmware update.

## Fixed Defects

- On first boot, the system would set the VRT time to unix time stamp of 0, as the time had not been loaded from the RTC. This fix re-sequenced the startup of the real-time clock (RTC) to correct the VRT time issue on boot-up.

## New Features

- N/A

## Known Issues and Limitations

No known issues or limitations.

## Document Revision History

This section summarizes document revision history.

Document Version	Release Date	Revisions and Notes
v1.0	2023-07-23	First release for firmware v1.1.7.
